INDOMITO  
BAJA OUTDOOR ACTIVITIES

**BOA** was born in 1994, founded by enthusiasts and explorers with the goal of discovering remote places through sea kayaking. 30 years later, in partnership with **INDÔMITO**, we continue to be a company dedicated to creating unique experiences in remote and untamed locations. Our main purpose is to transform people's environmental perspectives through outdoor activities. We specialize in creating moments that bring people closer to nature, allowing them to connect with it, and hoping to inspire in each explorer a deeper desire to protect our natural environments.

# OVERVIEW

**INDÔMITO's** school program is not just a school trip: it is a transformative experience that maximizes learning and sensitizes students to local ecosystems. Students have the opportunity to learn in an interactive, visual, and sensory way. During the trip, they practice soft skills such as leadership and communication, as well as technical skills in camping, hiking, Leave No Trace, and conservation.

At INDÔMITO , our goal is to change people's environmental perspectives. We deeply believe that the desire to preserve and protect our natural environments comes from love and knowledge of the ecosystems around us. This is why environmental education, together with the new generations, is our best way to fight climate change.

## THE FORMULA

Expeditions that combine desert terrestrial ecosystems with the diverse marine life of the Sea of Cortez, known as the “aquarium of the world.” All of this is guided by educators with years of experience and a deep passion for local ecosystems and environmental guides

## THE RESULTS

Most of the young people who participate in a trip with INDÔMITO experience many things for the first time: cooking on a camp stove, sleeping under the stars, doing a 360° turn in a kayak, seeing a whale’s tail, or even something as simple as being barefoot for some days.

In our expeditions, students “open their minds” to this dynamic way of learning and enter a new world of incredible experiences. Our programs attract the most inquisitive minds, rekindling curiosity and a passion for gaining more knowledge.

## THE PROGRAM

Most educational centers request programs lasting 1 to 3 weeks, but we also offer personalized courses that meets each institutions objectives. We know that each school has its own objectives. Most schools are interested in studying ecology, natural history, or the culture of Baja California Sur through adventure programs. Educational centers sometimes bring their teachers to facilitate the learning process, while our guides support and lead adventure activities.

To make each experience unique, we invest several weeks before the trip in the planning stage to develop programs tailored to the needs of each school and to meet the course’s goals and objectives.
